Staff Scientist
NIST

Justyna Zwolak
Technical Lead
NIST

Erin Taylor
Senior Scientist
GDA, Inc.

Riley Murray
Staff Scientist
Sandia Nat'l. Labs

Spectra, the Association for LGBTQ+ Mathematicians, is hosting a virtual panel on business, industry, and government (BIG) careers. This event is open to all, with a particular emphasis on undergrads and grad students looking for internships or graduating soon. Our panelists hail from diverse backgrounds and will speak to their experience in navigating their BIG jobs. We will also encourage audience members to ask questions in this intimate, accessible professional setting.

The panel will be moderated by **Matt Menickelly**, a computational mathematician at Argonne Nat'l. Lab; and organized by Rebecca R.G. and Dev Dabke.
